WAR MATTER AND OTHER PROPAGANDA AND THE PRESS

The administration, the Council of Defense and the various conservation departments are sending out circulars, communications, letters of instruction and other related matter every week to the newspapers to give information to be public and to arouse the people to greater patriotic effort.

The Red Cross department receives volumes of publicity and all these things bring to the newspaper offices vastly more matter than an ordinary paper can possibly use. Then comes three or four separate agencies connected with the educational, agricultural and industrial interests of the state all wanting space for publicity.

If these agencies would consolidate and send fewer documents and not overlap in their activities, it might be possible to give them some consideration, but as it now comes, the publisher doesn't like to discriminate and the result is that most of the stuff goes to the waste basket and some of it is hardly fit for that.

Along with these hundreds of letters to crowd the mails and in requiring printing, stamping and mailing out, we get letters from the packeries trying to explain themselves out of the hot water into which Food Commissioner Hensley has plunged them. This is for the special benefit of the packers, then comes a circular telling about the change in management of a certain insurance company together with a story of its solidarity, all matter of public information and marked: "Immediate Release." Plain simple advertising, but no check with it, consequently it is immediately released and goes to the junk pile.

American publishers are devoting columns of space every week to war propaganda. Glad to do it, and will continue to do it till the war is won and democracy saved, but no paper can use all the stuff that comes and have anytime or room left for news matter and the line has to be drawn. He will use what he can and it has been suggested that fewer clerks could easily send out all the government matter that can be used thus saving clerk hire, printing expense and mail facilities. Then when it comes to the department agencies now rushing extension work. Well, we can only promise to use some of duplicated matter after the war is over, and the special interests would come nearer getting their stuff printed in the country papers if some bona fide arrangement is made to pay for it at regular advertising rates.

A Billions Attack

When you have a billions attack your liver fails to perform its functions. You become constipated. The food you eat ferments in your stomach instead of digesting. This inflames the stomach and causes nausea, vomiting and a terrible headache. Take Chamberlain's Tablets. They will tone up your liver, clean out your stomach and you will soon be as well as ever. They only cost a quarter.

Since the two leading political parties have voted to prohibit the manufacture and sale of liquor in the United States, the prohibition party has decided to switch to something else. Two hundred delegates met in Chicago recently and decided to organize the national party. Two of their tenets are Woman Suffrage and Government Ownership of Public Utilities. Maybe they can induce a few Socialists to join them.

Eld. W. L. Henderson, Pastor The Aurora Borealis.

Did you see the Aurora Borealis last Thursday night? Reports have come from many points that the phenomenon was seen by numbers of people. The Aurora Borealis is a northern light caused by electrical disturbances in the region of the North pole. It is said that it has never been seen south of the 30th degree north latitude and very seldom in the Southern States. The sight is sublime. Streaks of red shoot up and spread in fan shape and play along the north horizon as if a fire was raging and people are apt to mistake it for a fire. The aurora borealis is often seen in the north latitudes and excite no wonder, but in the south it attracts much comment.

Stock Selling at 10c a Share

\$20 buys 200 shares; \$50 buys 500 shares; \$100 buys 1000 shares. If desired, send 2c a share each and 2c per share each month, 5 per cent discount for all cash.

Figure what it means if it advances to \$1.00 or \$10.00 as others have done.

Our holdings are in Wyoming, Oklahoma, Kansas, Kentucky, Colorado, Texas where wells produce as high as 10,000 barrels daily. One 100-barrel well will pay \$23,000.00 a year, which would enable us to pay 4 per cent a month dividends on stock issued, as 50 per cent of net profits are to be paid in dividends to stockholders.

We are selling stock to increase holdings, drill wells and pay dividends. Buy now before it advances.
